

# RUSTIC RAIL

By:

Appalachian's *Rustic Rail* is an easy to assemble rail system that we designed for log homes and mountain cottages. It has a rough finish, but is manufactured uniformly for ease of assembly.

The balusters are full round 1.75" with 1" pin ends.

The rail, which has a net size of 2.75" x 2.75" x 96", is available in two versions: Pre-bored to 4" code, or plain for boring on site for stairways and other non-code applications.
